

P5

Floor-standing loudspeaker system

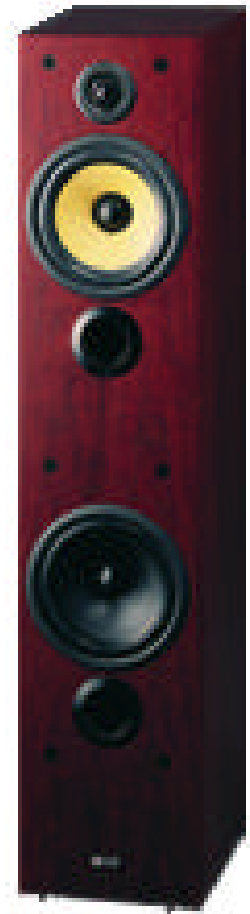

Product Summary

- P5 is the mid-sized speaker in the P Series - 9% smaller than the P6 and 33% larger than the P4. All P Series speakers share the same width - a slim 200mm.
- The key point of difference in the P5 is the lower bass drive unit, also present in the P6 but not the P4. It is in fact an extra bass-only drive unit; a 165mm dia Cobex® unit housed in its own separate reflex cavity within the cabinet.
- The unusual thing about this unit is that the B&W engineers have deliberately taken the decision to select a lower bass drive unit which has different characteristics to the Kevlar® bass/midrange unit. This brings an extra degree of freedom to tailor the low-frequency response for the best possible combination of accuracy and extension which would not normally be possible

Technical highlights

Kevlar®: B&W developed and patented the method of using Kevlar® for loudspeaker cones to reduce unwanted standing waves. DuPont originally created Kevlar® for use in bulletproof vests.

Description	3 way 4th order twin vented box system	Power Handling	30W – 150W into 8 ohms on unclipped programme
Drive Units	1 x 25mm metal dome - high-frequency 1 x 165mm Kevlar® - bass/midrange 1 x 165mm Cobex® - bass	Dimensions	Height: 905mm Width: 200mm Depth: 301mm
Frequency Response	42Hz – 20Hz ±2dB on reference axis	Finish	Black Ash, Rosenut, Cherrywood Grille: Black Cloth
Sensitivity	90dB spl(2.83V 1m)		
Nominal Impedance	8 ohms (minimum 3.5 ohms)
