

VM1

The VM1 is a multi-application speaker for use in five-channel home theatre or two-channel hi-fi systems. Magnetically-shielded, the VM1 can occupy all five positions in a home theatre set-up, including the centre channel, laid horizontally or mounted on its supplied table-stand on a TV. Its body, moulded in high-strength polypropylene, features contemporary styling – including tactile, elastomeric trim – that encompasses the product. B&W's dimpled Flowport, is integrated into the rear of the speaker. There are a number of mounting options available with the VM1. The speaker can be mounted vertically on a wall bracket or an optional stand, or positioned horizontally as a home theatre centre channel, either on its side or on the supplied foot.
