

CASA™ Interface

Product Summary

- Outside of a Casa system the Interface is used to power a stereo pair of Casa speakers.
Three Interfaces can be used with Casa speakers to create a surround system. The interface also provides a way of boosting the power output of Casa to allow very long cable runs or many multiple loudspeakers in a zone.

The Casa system was awarded
Innovations Award 1998
CES/Las Vegas USA

Product of the Year 1998
Hi-Fi Grand Prix Award
Audio Video International USA

Product of the Year 1999
Hi-Fi Grand Prix Award
Audio Video International USA
