

DM™ 601

Stand-mount/Bookshelf loudspeaker system

Product Summary

- The DM 601 is the smallest in the 600 Series although it can still produce a big sound. It has a 165 mm (6.5 in) Kevlar® bass/mid-range driver that employs the same profile as B&W's more sophisticated P Series ensuring delivery of a natural, neutral sound with very low coloration.
- As well as the 600 Series standard features the DM 601 also boasts flared reflex ports which dramatically increase bass efficiency and power handling. Added to this is rounded-profile zinc clamping rings which connect the drivers to the cabinet and minimise the effect of diffraction around the drive unit as sound waves travel out across the face of the speaker cabinet.
- The DM 601 is recommended for shelf or stand mounted applications and is ideally suited to both front and rear channel speakers in a Home Cinema system.

Technical highlights

Kevlar®: B&W developed and patented the method of using Kevlar® for loudspeaker cones to reduce unwanted standing waves. DuPont originally created Kevlar® for use in bulletproof vests.

Description	2 way vented-box system	Power handling	25W –100W into 8 ohms on unclipped programme
Drive units	1x 25mm metal dome - high-frequency 1x 165mm Kevlar® cone bass/midrange	Dimensions	Height: 356mm Width: 204mm Depth: 244mm
Frequency response	70Hz – 20kHz ± 3dB on reference axis	Finishes	Black Ash vinyl, Cherrywood vinyl Grille: Black Cloth
Sensitivity	88dB spl(2.83V 1m)		
Nominal impedance	8 ohms (minimum 4.2 ohms)
